MEDICAL
PROCEDURES

MEDICAL PROCEDURES

3D BODY SCAN (STYKU)

€ 130 - 10 MIN

An easy and non-invasive full-body scanning. It requires one to stand still on a turntable and hold the pose for about 40 seconds. While the turntable is rotating, an infrared 3D camera extracts millions of data in order to evaluate measurements and create your 3D model. Styku is a supportive approach for performing body shape analysis and for meeting your body composition goals.

BIOELECTRICAL IMPEDANCE ANALYSIS (BIA)

€ 100 - 10 MIN

A non - invasive and broadly used approach for the assessment of the body composition in different clinical conditions. The measurement is obtained standing on the device and holding the electrodes for 60 seconds. BIA determines your body composition in terms of fat mass, muscle mass and hydration status. For that reason, it is advised to perform in the fasting state.

ELECTROCARDIOGRAM (ECG)

€ 100 - 10 MIN

A safe, painless and non-invasive procedure performed to measure heart electrical activity. It may help to diagnose heart conditions and arrhythmias in people of all ages. The test is performed by attaching

electrodes to the skin. These can detect the electrical signals produced by each heartbeat.

TRANSVAGINAL ULTRASOUND

€ 350 - 30 MIN

Exam of female pelvic area and reproductive organs including uterus, ovaries, uterine tubes, cervix and vagina. There are no known risk factors related to this type of examination. Analysis is safe to perform on pregnant women.

CAROTID ULTRASOUND

€ 240 - 30 MIN

Performed to screen for shrinkage of the carotid arteries. Diagnosis is useful to start treatments that improve blood supply from the heart to the brain, reducing the risk of a stroke.

ABDOMINAL ULTRASOUND

€ 350 - 30 MIN

A non invasive and painless procedure performed to assess the morphology of organs located in the abdominal cavity. It is used to detect changes, to evaluate pain or distension of the abdomen, and to assess abdominal aorta, liver, gallbladder, bile ducts, pancreas, spleen, and kidneys.

MEDICAL PROCEDURES

PROSTATE ULTRASOUND

€ 300 - 30 MIN

Performed to evaluate the volume of the gland and highlight any abnormalities that may signal the presence of prostate disease. It is a non-invasive and painless examination.

VASCULAR LOWER LIMBS ULTRASOUND

€ 250 - 30 MIN

A non-invasive ultrasound procedure performed to evaluate blood circulation in the arteries and veins. It is also critical to detect the presence, the location and the severity of vascular diseases and blood clots, and to monitor patients after vascular procedure.

TESTICULAR ULTRASOUND

€ 220 - 30 MIN

Painless and non-invasive examination. Useful to diagnose any conditions such as: pain in the scrotum, testicular cancer, cysts, hernias and other pathologies.

RENAL ARTERY ULTRASOUND

€ 240 - 30 MIN

A non-invasive diagnostic examination that investigates arterial blood circulation directed to the kidneys. Furthermore, the blood vessels and the flow within them are also evaluated.

THYROID AND PARATHYROID ULTRASOUND

€ 240 - 30 MIN

Performed to evaluate the size and morphology of the thyroid gland. This exam is useful to diagnose disorders of the thyroid gland and or parathyroid glands in the neck.

SOFT TISSUE ULTRASOUND

€ 220 - 30 MIN

Performed for the study of benign and neoplastic inguinal, axillary and neck lymph nodes. In addition, it is used for the study of lipomas, cysts and hernias.

MEDICAL PROCEDURES

BREAST ULTRASOUND

€ 300 - 30 MIN

Produces an image of the internal structure of the breast used to help diagnose any abnormalities and, if there are, to help determine what type of abnormalities exist.

ECHOCARDIOGRAPHY

€ 400 - 30 MIN

Ultrasound to check the heart and nearby blood vessels. The echocardiogram is used to monitor and control the condition of the heart. It allows to verify the structure, analyze the blood flow and evaluates the condition of the arteries and ventricles.

COLON HYDROTHERAPY

€ 300 - 60 MIN

Colon Hydrotherapy represents the hygienic treatment of cleansing the colon, aiming to restore the correct function of the colon and to improve digestion and gastrointestinal symptoms. The treatment is performed gently infusing filtered warm water into your colon. During the session, the water passes into and out the large intestine, while the nurse will provide a light abdominal massage.

CRYOTHERAPY

€ 150 - 10 MIN

A controlled cold exposure, from shoulders to toe, inside a cryochamber. To mitigate pain and improve circulation, strengthen blood vessels, reduce recovery time after illness or surgery, release endorphines and oxygenates cells, remove stress, improve the quality of the skin, eliminate toxins and burn calories.

DYNOSTICS

€ 200 - 30 min

Dynostics is a smart system for the analysis of your performance and metabolism and determines your current fitness levels in a just few minutes, based on respiratory gases. The metabolism analysis determines the personal basal metabolic rate, which determines the exact calorie consumption per day, as well as the proportion of carbohydrates, fat and protein.

MEDICAL PROCEDURES

SLEEP BANDS

€ 420 consultation included

At Palazzo Fiuggi, our guests can experience a new category of wearable digital therapeutics for brain health and sleep disorders. Our aim is to help our guests to fall asleep and enjoy a restorative and healthy resting time. Also, the beneficial effects will help to relieve stress, insomnia and migraine.

SPIROMETRY

€ 130 - 15 MIN

A test to diagnose and monitor different lung conditions (such as asthma, chronic obstructive pulmonary disease, and pulmonary fibrosis) by measuring how much air you can breathe out in one forced breath. The spirometry test is carried out by using a device called “spirometer”, which is a small machine attached by a cable to a mouthpiece.

NILAS BIORESONANCE

€ 100 - 30 MIN

By measuring biorhythms controlled by the autonomous and central nervous system, which are closely linked with the brain, immune, digestive, and endocrine systems. It measures the biological age and a global assessment of an individual's overall health status.

INTRA-ARTICULAR INJECTION OF CORTICOSTEROIDS

€ 600 - 30 MIN

Intra-articular corticosteroid injections are often used for short-term pain relief in people with knee osteoarthritis. The pain relief from a steroid injection works by reducing inflammation within the arthritic knee, improving both pain and function.

INTRA-ARTICULAR INJECTION OF HYALURONIC ACID

€ 800 - 30 MIN

Intra-articular injection of hyaluronic acid can be used for the treatment of arthropathy of the knee when mild-to-moderate degenerative changes can be visualized on plain radiographs. The use of hyaluronic acid leads to a reduction of pain and improvement of functional mobility. The benefits for quality-of-life scores, generally within 1 week and can last between 3-12 months.

ACUPUNCTURE

€ 400 - 30 MIN

An alternative medicine, which makes use of the insertion of needles in specific points of the human body, in order to help the health and well-being of the individual. According to traditional Chinese medicine, stimulating these points can correct imbalances in the flow of vital energy through channels known as “meridians”.

MEDICAL PROCEDURES

AIRNERGY

€100 - 30 MIN

Spirovital Therapy is a method, device and treatment in one, which creates “energised air”. For only 20 minutes daily, the guest breathes this air which is produced with the help of a natural process similar to photosynthesis in green leaves. This feeds every cell in your body with oxygen. The treatment can promote health, quality of life, regeneration and well-being in a natural way, particularly in persons suffering from stress, chronic conditions (including cardiovascular illnesses and lung conditions) and aging.

OZONETHERAPY

€ 200 - 30 MIN

Combining ozone and oxygen produces a series of benefits that can counteract a wide range of disease (disc herniation, acne, phlebitis, fibromyalgia, infections, hemorrhoids, osteoarthritis, cellulitis, ulcers, burns, and osteoporosis). This treatment allows, thanks to the properties of ozone in association with those of oxygen, to significantly improve the defence systems of the body against the action of free radicals.
